Mammals: Animals with Hair

There are so many different types of mammals. Dogs, cats, elephants, and even whales are mammals. You're a mammal, too! That's right, humans are mammals.

How are mammals alike? Mammals are living creatures that have a backbone, also known as a spine. They grow hair on their bodies, which we often call fur. Mammals can live in every habitat. But most mammals live on land, while some live in water.

Most mammals give birth to live babies. Mothers make milk to feed their babies. Young mammals learn how to survive from their parents.

Mammals use different ways to communicate or talk to each other. Dogs communicate by barking and wagging their tails. Some cats meow, others roar. Humans use language to talk.

Humans and other mammals share the same habitat. People often use the habitat of other mammals to build their homes. This can endanger the mammals because they won't have a place to live. When we protect the habitat of other mammals, they will have a home of their own, too.

25. Read the passage below and answer the question.

Mammals: Animals with Hair

There are so many different types of mammals. Dogs, cats, elephants, and even whales are mammals. You're a mammal, too! That's right, humans are mammals.

How are mammals alike? Mammals are living creatures that have a backbone, also known as a spine. They grow

hair on their bodies, which we often call fur. Mammals can live in every habitat. But most mammals live on land, while some live in water.

Most mammals give birth to live babies. Mothers make milk to feed their babies.

Young mammals learn how to survive from their parents.

Mammals use different ways to communicate or talk to each other. Dogs communicate by barking and wagging their tails. Some cats meow, others roar.

Humans use language to talk.

Humans and other mammals share the same habitat. People often use the habitat of other mammals to build their homes. It is dangerous for mammals to lose their habitats because they won't have a place to live. When we protect the habitat of other mammals, they will have a home of their own, too.

Taken from: readworks.org

Why can losing their habitat be dangerous for mammals?

- A. They will learn to fly.
- B. They will have more food.
- C. They can move to other planets.
- D. They won't have a place to live.

At school

Lucas goes to school every day of the week. He has many subjects to go to each school day: English, art, science, mathematics, and history. His mother packs a big backpack full of books and lunch for Lucas.

His first class is English, and he likes that teacher very much. His English teacher says that he is a good pupil, which Lucas knows means that she thinks he is a good student.

His next class is art. He draws on paper with crayons and pencils and sometimes uses a ruler. Lucas likes art. It is his favorite class.

His third class is science. This class is very hard for Lucas to figure out, but he gets to work with his classmates a lot, which he likes to do. His friend, Kyle, works with Lucas in science class, and they have fun.

Then Lucas gets his break for lunch. He sits with Kyle while he eats. The principal, or the headmaster as some call him, likes to walk around and talk to students during lunch to check that they are all behaving.

The next class is mathematics, which most of the students just call math. Kyle has trouble getting a good grade in mathematics, but the teacher is very nice and helpful.

History is his last class of the day. Lucas has a hard time staying awake. Many lessons are boring, and he is very tired.

15. "His English teacher says that he is a good pupil...". What does the word "he" in the sentence refer to?
- A. Lucas' teacher
 - B. Lucas' father
 - C. Lucas' friend
 - D. Lucas
16. Which of the following best describes Lucas's experience in science class?

 - B. He struggles with it but enjoys working with his classmates.
 - C. He dislikes it and never participates.
 - D. He thinks it is boring and prefers to sleep.
17. What is the closest meaning of the word "pupil?"
- A. Teacher
 - B. Student
 - C. Principal
 - D. Parent

For no. 18-20, please read this text and cross the correct answer.

Martha is at the grocery store, getting ready for a house party. She has a list of what she needs with her as she goes along. The first section she comes has produce. Martha sees apples, bananas, cherries, grapes, and strawberries. She checks her list:

- 6 apples
- 1 bag of cherries
- 1 bag of grapes
- 2 cartons of strawberries

Martha gets her items and looks at the bananas. They are on sale for much cheaper than they are normally. She picks 3 bananas. Next are vegetables. She sees potatoes, carrots, tomatoes, onions, mushrooms, and salad in bags. She checks her list:

- 5 pounds of potatoes
- 6 carrots
- 4 tomatoes
- 2 onions
- 4 mushrooms

As she is putting her items into her cart, Martha checks the many bags of salad and chooses 2 of them. She pushes her cart ahead. The next section is meat and dairy. She sees meat, fish, cheese, eggs, and milk. She checks her list:

- 2 fish (salmon)
- 1 block of cheese (cheddar)
- 1 dozen eggs
- 2 gallons of milk

She looks at the meat that is on sale and chooses a 5-pound roll of hamburger. She gets the rest of the items in that section. She still needs rice, bread, salt, sugar, and flour. She gets:

- 2 bags of rice
- 4 loaves of bread

- a 2-pound bag of sugar
- a 2-pound bag of flour

Martha then realizes that she has forgotten something. She runs back and gets 1 container of salt and then rushes to the checkout. She puts her groceries into her car and leaves.

At school

Lucas goes to school every day of the week. He has many subjects to go to each school day: English, art, science, mathematics, and history. His mother packs a big backpack full of books and lunch for Lucas.

His first class is English, and he likes that teacher very much. His English teacher says that he is a good pupil, which Lucas knows means that she thinks he is a good student.

His next class is art. He draws on paper with crayons and pencils and sometimes uses a ruler. Lucas likes art. It is his favorite class.

His third class is science. This class is very hard for Lucas to figure out, but he gets to work with his classmates a lot, which he likes to do. His friend, Kyle, works with Lucas in science class, and they have fun.

Then Lucas gets his break for lunch. He sits with Kyle while he eats. The principal, or the headmaster as some call him, likes to walk around and talk to students during lunch to check that they are all behaving.

The next class is mathematics, which most of the students just call math. Kyle has trouble getting a good grade in mathematics, but the teacher is very nice and helpful.

History is his last class of the day. Lucas has a hard time staying awake. Many lessons are boring, and he is very tired.

Martha is at the grocery store, getting ready for a house party. She has a list of what she needs with her as she goes along. The first section she comes has produce. Martha sees apples, bananas, cherries, grapes, and strawberries. She checks her list:

- 6 apples
- 1 bag of cherries
- 1 bag of grapes
- 2 cartons of strawberries

Martha gets her items and looks at the bananas. They are on sale for much cheaper than they are normally. She picks 3 bananas. Next are vegetables. She sees potatoes, carrots, tomatoes, onions, mushrooms, and salad in bags. She checks her list:

- 5 pounds of potatoes
- 6 carrots
- 4 tomatoes
- 2 onions
- 4 mushrooms

As she is putting her items into her cart, Martha checks the many bags of salad and chooses 2 of them. She pushes her cart ahead. The next section is meat and dairy. She sees meat, fish, cheese, eggs, and milk. She checks her list:

- 2 fish (salmon)
- 1 block of cheese (cheddar)
- 1 dozen eggs
- 2 gallons of milk

She looks at the meat that is on sale and chooses a 5-pound roll of hamburger. She gets the rest of the items in that section. She still needs rice, bread, salt, sugar, and flour. She gets:

- 2 bags of rice
- 4 loaves of bread

- a 2-pound bag of sugar
- a 2-pound bag of flour

Martha then realizes that she has forgotten something. She runs back and gets 1 container of salt and then rushes to the checkout. She puts her groceries into her car and leaves.

The Three Little Pigs

Once upon a time, there were three little pigs who were ready to leave home and build their own houses. Their mother warned them to be careful and to build their houses strong, so they could protect themselves from the big bad wolf that roamed the woods.

The first little pig, eager to finish quickly, decided to build his house out of straw. It was fast and easy, and he thought it would be good enough. After a short time, his house was complete, and he happily relaxed, thinking he had finished the hard work.

The second little pig was a bit more cautious, so he built his house out of sticks. It took a little longer than the straw house, but it still wasn't very strong. Once it was finished, he too sat back, feeling proud of his work.

The third little pig, the wisest of them all, decided to take his time and build his house out of bricks. He worked hard, laying each brick carefully, and made sure his house would be strong enough to withstand any danger. It took a lot of effort, but he knew it would be worth it.

One day, the big bad wolf came wandering through the forest. He first approached the straw house of the first pig. The wolf knocked on the door and said, "Little pig, little pig, let me in." But the little pig replied, "Not by the hair on my chinny chin chin!" The wolf, angry, huffed and puffed and blew the straw house down. The first little pig ran as fast as he could to the second pig's house.

The wolf then came to the stick house. He knocked on the door and said, "Little pigs, little pigs, let me in." But the pigs responded, "Not by the hair on our chinny chin chins!" The wolf huffed and puffed again and blew the stick house down. The two little pigs ran as fast as they could to the brick house.

The wolf, growing more frustrated, reached the brick house and repeated, "Little pigs, little pigs, let me in." But the pigs refused again. The wolf huffed and puffed with all his might, but he couldn't blow the brick house down. He tried climbing down the chimney, but the clever pigs had a pot of boiling water waiting. When the wolf fell into it, he scorched his tail and hurried off, never to return.

The three little pigs celebrated their victory. They realized that the hard work of building a strong house had paid off. From that day on, they lived happily and safely, knowing that their strong homes would protect them from any danger.

11. Why did the third little pig decide to build his house out of bricks?
- A. He wanted a house that would be easy and quick to build.
 - B. He believed it would be the strongest and safest option.
 - C. He liked the color of bricks more than straw or sticks.
 - D. He thought it would be the cheapest material.
12. "When the wolf fell into it, he scorched his tail and hurried off, never to return."
(Paragraph 7) The underlined word refers to.....
- A. the chimney
 - B. the brick house
 - C. the pot of boiling water
 - D. the fire
13. What can we learn from the smartest pig as a student? We have to....
- A. finish our assignments quickly
 - B. be confident in the results of our work.
 - C. take time to plan and work hard
 - D. be responsible to our duties

How a Honeycomb is Created

A honeycomb is a special structure made by honeybees to store their honey and babies (called larvae). It's built with great care and teamwork.

The process begins when a worker bee goes out to collect nectar from flowers. The bee takes the nectar back to the hive and changes it into honey inside its body. Once it has honey, the bee produces small wax flakes from its body and chews them until they are soft.

Next, the bees shape the soft wax into tiny cells. These cells are arranged in the shape of a hexagon – a six-sided figure. This shape is perfect because it uses the least amount of wax while still being very solid. It also helps store a lot of honey in a small space.

Once the bees build the honeycomb, they fill each cell with honey. They fan their wings to dry the honey and make it thick. After that, they seal the cells with more wax to keep the honey fresh for later.

The honeycomb isn't just for honey – it's also where baby bees grow. The bees work together to make sure the hive has enough honey and that the baby bees are safe. The honeycomb is a great example of how bees work hard and smart to keep their hive running smoothly.

In the end, the honeycomb is a perfect design made by bees to store food and care for their young, all while using space and wax in the most efficient way possible.

14. What do worker bees collect from flowers to turn into honey?
- A. water
 - B. nectar
 - C. pollen
 - D. wax
15. "This shape is perfect because it uses the least amount of wax while still being very solid." What is the synonym of the underlined word?
- A. sticky
 - B. strong
 - C. unstable
 - D. unsafe

16. What can the bees do with the honeycomb's design? They can.....

- A. use more wax to create stronger cells
- B. keep the honey in a small space
- C. keep the hive warm during the winter
- D. protect the honey from getting too hot

- D. III - IV - II - I

Read the text to answer questions number 18–20.

Last Saturday, our school football team played against a rival school at the sports field near our school. The stands were full of fans cheering us on, and we knew it was going to be a tough match. From the start, both teams played hard. We had some chances to score, but their goalkeeper made some great saves. The first half ended with no goals, and we were all ready to give even more effort in the second half.

In the second half, the match got more difficult. The other team scored quickly, making the score 1-1. We were a little worried, but we kept playing hard and didn't give up. There were many close moments when we almost scored, but their defense was strong, and we couldn't get the ball in the net. Our goalkeeper also made some great saves to keep us in the match. The match was very tense, and we knew we had to focus and play our best to win.

In the last few minutes of the match, we finally got our chance. Sarah passed the ball to Tom, who took a strong shot at the goal. The ball went past the goalkeeper and into the net! We had scored the winning goal! The crowd cheered, and our team celebrated together. We had won 2-1, and everyone was so happy. It was a tough match, but we played our best and felt proud of our victory. We can't wait for our next game!

18. What did the team know about the match before it started?
- A. The game would be easy.
 - B. The game would be hard.
 - C. The team would win.
 - D. The rival team would win.
19. What happened after the other team scored in the second half?
- A. The team gave up playing.
 - B. The other team's goalkeeper made great saves.

- C. The team continued to play with full effort.
- D. The match ended right after they scored.

20. **Read these statements.**

- I The football match took place at the sports field close to our school.
- II The team won the match easily with no difficulty.
- III The match ended in a tie, and there was no winner.
- IV The team scored the final goal in the last few moments of the match to win.
- V The match was played indoors instead of on a field.
- VI The other team scored early in the second half, tying the game at 1-1.

The correct statements are.....

- A. I - II - VI
- B. I - III - IV
- C. I - IV - V
- D. I - IV - VI

But the little pig replied, "Not by the hair on my chinny chin chin!" The wolf, angry, huffed and puffed and blew the straw house down. The first little pig ran as fast as he could to the second pig's house.

The wolf then came to the stick house. He knocked on the door and said, "Little pigs, little pigs, let me in." But the pigs responded, "Not by the hair on our chinny chin chins!" The wolf huffed and puffed again and blew the stick house down. The two little pigs ran as fast as they could to the brick house.

The wolf, growing more frustrated, reached the brick house and repeated, "Little pigs, little pigs, let me in." But the pigs refused again. The wolf huffed and puffed with all his might, but he couldn't blow the brick house down. He tried climbing down the chimney, but the clever pigs had a pot of boiling water waiting. When the wolf fell into it, he scorched his tail and hurried off, never to return.

The three little pigs celebrated their victory. They realized that the hard work of building a strong house had paid off. From that day on, they lived happily and safely, knowing that their strong homes would protect them from any danger.

11. Why did the third little pig decide to build his house out of bricks?
- A. He wanted a house that would be easy and quick to build.
 - B. He believed it would be the strongest and safest option.
 - C. He liked the color of bricks more than straw or sticks.
 - D. He thought it would be the cheapest material.
12. "When the wolf fell into it, he scorched his tail and hurried off, never to return."
(Paragraph 7) The underlined word refers to.....
- A. the chimney
 - B. the brick house
 - C. the pot of boiling water
 - D. the fire
13. What can we learn from the smartest pig as a student? We have to....
- A. finish our assignments quickly
 - B. be confident in the results of our work.
 - C. take time to plan and work hard
 - D. be responsible to our duties

How a Honeycomb is Created

A honeycomb is a special structure made by honeybees to store their honey and babies (called larvae). It's built with great care and teamwork.

The process begins when a worker bee goes out to collect nectar from flowers. The bee takes the nectar back to the hive and changes it into honey inside its body. Once it has honey, the bee produces small wax flakes from its body and chews them until they are soft.

Next, the bees shape the soft wax into tiny cells. These cells are arranged in the shape of a hexagon – a six-sided figure. This shape is perfect because it uses the least amount of wax while still being very solid. It also helps store a lot of honey in a small space.

Once the bees build the honeycomb, they fill each cell with honey. They fan their wings to dry the honey and make it thick. After that, they seal the cells with more wax to keep the honey fresh for later.

The honeycomb isn't just for honey – it's also where baby bees grow. The bees work together to make sure the hive has enough honey and that the baby bees are safe. The honeycomb is a great example of how bees work hard and smart to keep their hive running smoothly.

In the end, the honeycomb is a perfect design made by bees to store food and care for their young, all while using space and wax in the most efficient way possible.

14. What do worker bees collect from flowers to turn into honey?
- A. water
 - B. nectar
 - C. pollen
 - D. wax
15. "This shape is perfect because it uses the least amount of wax while still being very solid." What is the synonym of the underlined word?
- A. sticky
 - B. strong
 - C. unstable
 - D. unsafe

16. What can the bees do with the honeycomb's design? They can.....

- A. use more wax to create stronger cells
- B. keep the honey in a small space
- C. keep the hive warm during the winter
- D. protect the honey from getting too hot

Last Saturday, our school football team played against a rival school at the sports field near our school. The stands were full of fans cheering us on, and we knew it was going to be a tough match. From the start, both teams played hard. We had some chances to score, but their goalkeeper made some great saves. The first half ended with no goals, and we were all ready to give even more effort in the second half.

In the second half, the match got more difficult. The other team scored quickly, making the score 1-1. We were a little worried, but we kept playing hard and didn't give up. There were many close moments when we almost scored, but their defense was strong, and we couldn't get the ball in the net. Our goalkeeper also made some great saves to keep us in the match. The match was very tense, and we knew we had to focus and play our best to win.

In the last few minutes of the match, we finally got our chance. Sarah passed the ball to Tom, who took a strong shot at the goal. The ball went past the goalkeeper and into the net! We had scored the winning goal! The crowd cheered, and our team celebrated together. We had won 2-1, and everyone was so happy. It was a tough match, but we played our best and felt proud of our victory. We can't wait for our next game!

18. What did the team know about the match before it started?
- A. The game would be easy.
 - B. The game would be hard.
 - C. The team would win.

The Three Little Pigs

Once upon a time, there were three little pigs who were ready to leave home and build their own houses. Their mother warned them to be careful and to build their houses strong, so they could protect themselves from the big bad wolf that roamed the woods.

The first little pig, eager to finish quickly, decided to build his house out of straw. It was fast and easy, and he thought it would be good enough. After a short time, his house was complete, and he happily relaxed, thinking he had finished the hard work.

The second little pig was a bit more cautious, so he built his house out of sticks. It took a little longer than the straw house, but it still wasn't very strong. Once it was finished, he too sat back, feeling proud of his work.

The third little pig, the wisest of them all, decided to take his time and build his house out of bricks. He worked hard, laying each brick carefully, and made sure his house would be strong enough to withstand any danger. It took a lot of effort, but he knew it would be worth it.

One day, the big bad wolf came wandering through the forest. He first approached the straw house of the first pig. The wolf knocked on the door and said, "Little pig, little pig, let me in." But the little pig replied, "Not by the hair on my chinny chin chin!" The wolf, angry, huffed and puffed and blew the straw house down. The first little pig ran as fast as he could to the second pig's house.

The wolf then came to the stick house. He knocked on the door and said, "Little pigs, little pigs, let me in." But the pigs responded, "Not by the hair on our chinny chin chins!"
